

# Essex Development Partnership

The Essex Development Partnership (EDP) launched earlier this year formally announced Chelmer Housing Partnership's (CHP) working partnership with the Flagship Housing Group (FHG).

The partnership enables CHP to increase its housing stock by combining its extensive management experience and ideal location - M11 Corridor and Thames Gateway - with Flagship's proven reputation and history in development to meet housing needs across Essex.

## Forging ahead

The EDP has already secured its first development of affordable housing in the Uttlesford district and negotiations are well underway for CHP to provide housing management services for Flagship's existing Essex based stock.

## Good practice - the key to success

CHP and the FHG are committed to making the partnership succeed and believe that maintaining good practice in development methods will provide the key to success in the future.
